To Whom It May Concern

I am writing to extend my sincere appreciation for the exceptional Telehealth services provided by Budget ICU at Dr. Rajendra Prasad Govt. Medical College & Hospital.

As a primary user of these services, I had the opportunity to witness the transformative impact of the trial and demonstration, which is still in use. The seamless integration of advanced technology with critical care management was truly impressive, showcasing the team's expertise and unwavering dedication to excellence.

The system, deployed in Neurosurgery-ICU, proved to be highly beneficial. The Budget ICU systems and support were outstanding, with 24/7 availability for guidance and issue resolution. The product interface was user-friendly for all doctors and nurses, facilitating better collaboration and coordination. Additionally, the system's capacity to support remote healthcare effectively freed up doctors' time, thereby enhancing productivity.

The successful implementation of this pilot has established Budget ICU as a leader enhance TeleHealth Services. The real-time data insights and streamlined critical care processes are a testament to the power of innovation and collaboration in healthcare.

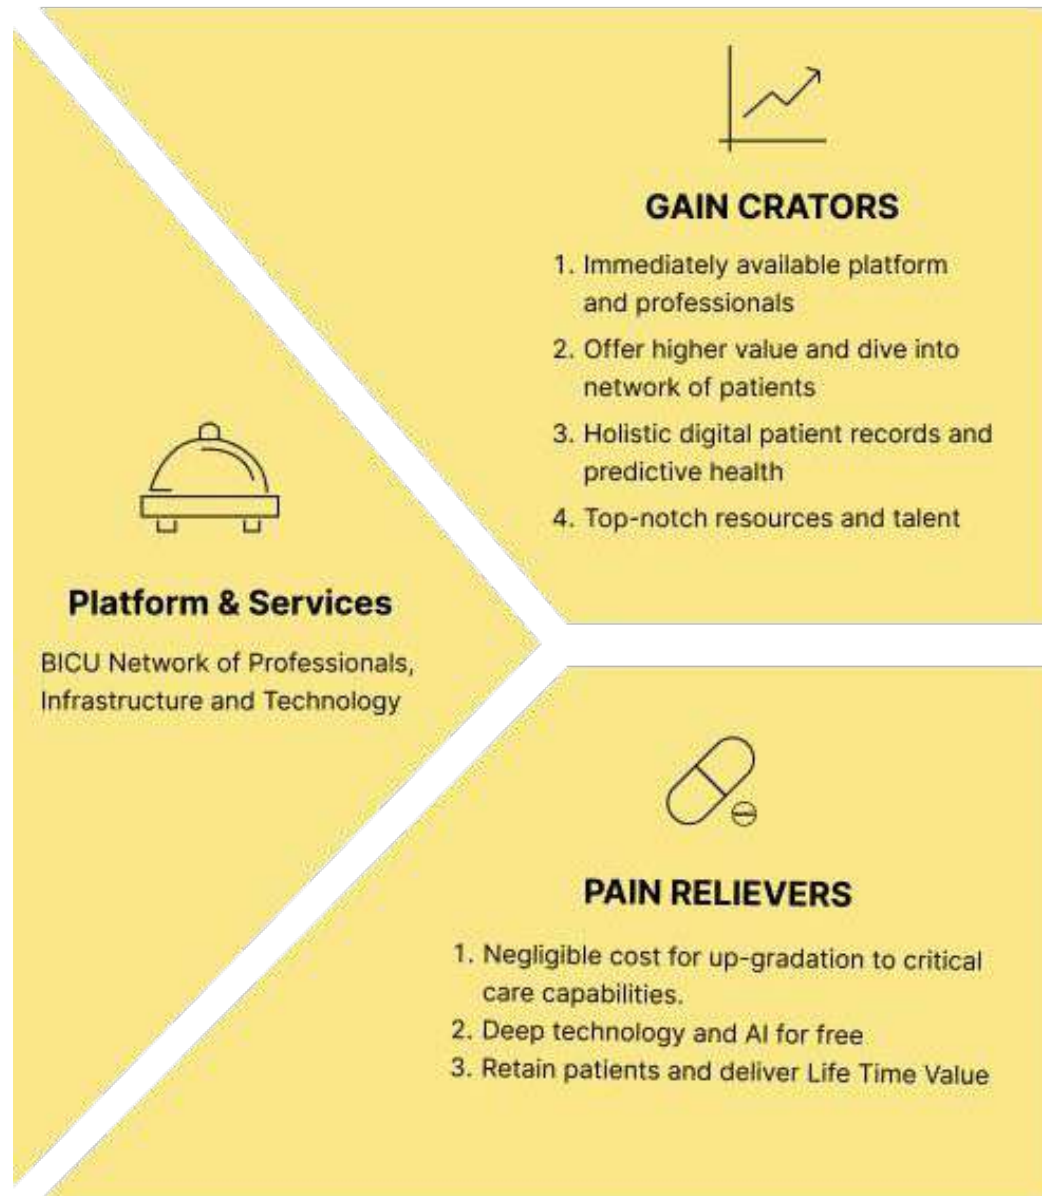

It's good to see the visionary approach and commitment of entire budget ICU team to excellence.
