

Flexible EV charger

Work as Stationary - Relocate to Vantage Points - Serve on Demand

Government recognized
Charge Point Operators

Incubated by
Automotive Research Association of India

ARAI-AMTIF

Our Products

Multi-Port Station

Multi-Port Station

A Flagship Model of the Company
Mobile Mode - 30kW/50KW
Still Mode - 90kW
- Level-3 CCS/Gb/T/Chademo
- Level-2 7.2/11.2/22.4
- Level-1
- Power by Hour 5A socket

Battery Charging Energy
Mobile Mode - 500 kWh Per day
Still Mode - 1400 kWh Per day

Dual-Port Station

Dual-Port Station

An EV Fleet Workhorse
Mobile Mode - 30kW/60KW
Still Mode - 60KW
- Level 3 CCS
- Level 3 Gb/T

Battery Charging Energy
Mobile Mode -320 kWh per shift
Grid Mode -480 kWh per shift

Uni-Port Station

EV RSA Station

A Quick Sleek & Rescue Friendly
Mobile Mode - 30kW
Still Mode - 30kW
- Level-3 CCS
- EV Workshop on board

Battery Charging Energy
Mobile Mode - 160 kWh Per day
Still Mode - 480 kWh Per day

Product USPs

1,000KWH/day

Fleet operators and OEMs will benefit from the

“Extended range we provide, allowing them to increase revenue currently lost due to limited charging options”

Feed in all possible 3 Phase electricity

On Grid or Microgrid on Autonomous alternative energy and moreover is Autogenic in case of no electricity

Flexibility

Install it anywhere - residential areas, parking lots, workplaces, retail centers, among others

Scalability

As demand grows, more decentralized stations can be installed without the need for significant upgrades to centralized infrastructure.

Grid Independence

Decentralized systems reduces the load on the central grid and making the entire network more sustainable

Reduced Congestion

Reduces long wait times at traditional charging stations

Tech-Enabled

Reservation systems for charging slots real-time monitoring of battery status

How it Works!

Navigate

Book

Charge

Pay

Simple mobile app to find a mobile charging station (M.C.S) in less than 10 seconds

We are offering Unmatched Convenience at **No Extra Cost**

	Mobile Charging Stations	Fix Charging Stations
No Geographical Limitations	✓	✗
Movable	✓	✗
Grid Independent	✓	✗
Easy Installation	✓	✗
No land dependency	✓	✗

Wow! Mobile charging station has so many benefits, must be costly?

No Extra cost. We are offering **M.C.S** at **same price** as fixed charging station 😊

Our Journey so far – Over the years, we have made strategic investments of ₹25 Mn+ in our operations, building a robust business foundation and establishing significant barriers to market entry

FY2022-23

Strategically invested over ₹10 Mn in developing our proprietary hardware patented technology, MCS

FY2023-24

- Invested ₹5 Mn into developing
- Cloud-enabled IoT-based proprietary software
 - An advanced CRM system
 - A smart battery powered by IoT

FY2024-25

Working on another patented hardware solution, the RSA (Roadside Assistance) technology, which integrates a proprietary smart battery system

Gained significant interests for our products internationally

Business Interest from Malaysia, Thailand & USA under discussions

Partnered with some of the leading industry players

The Future Roadmap - We have consistently invested in the business for its continuous growth and are committed to doing so in the future

2024-25

- Secure Investments of \$2 Mn
- DBOO (Design Build Own and Operate) in NCR Delhi

2025-26

- Expansion DBOO in NCR Delhi
- Appoint DBOTS (Design Build Own and Transfer on Subscription) to channel partners outside NCR, including international tie-ups

2026-27

- Achieve over 250 stations in NCR
- Achieve over 250 stations outside NCR
- Develop own brand of custom vehicles for company's successful battery charging stations

Why Us?

Strong barriers to entry for other players through patented products

Advanced technology behind our charging station, including mobile apps, IOT integration, and fleet management analytics

Differentiation through flexibility & customizations

Certified by ARAI, an independent and government-recognized authority responsible for testing and certifying vehicles for safety, emissions, fuel efficiency, among others

Green initiative that supports the ESG (Environmental, Social, Governance) goals of corporates

Multi-model business allows us to adapt to changing market conditions and consumer preferences

Managed By A Team Of Seasoned Professionals

Rana Singh
Founder & CEO

25+ years of experience in technology development, green energy solutions, and business management

Vivek Ummat
Co-founder & President

Former Executive Director of PSL Ltd, with 32+ years of expertise in managing Indian and international projects, specializing in execution, cost estimation, and procurement

Iyer Kannan Srinivasan
Additional Director

With 44+ years of experience & has immense experience in electrical machine design, microprocessor-based systems, and adaptive control systems positions him as a leader in his field.
