

WHAT WE DO

We provide on-grid/off-grid solar integrated Energy & Charging as a Service (E/CaaS) for Green Energy delivery and fast charging.

WITH US YOU HAVE:

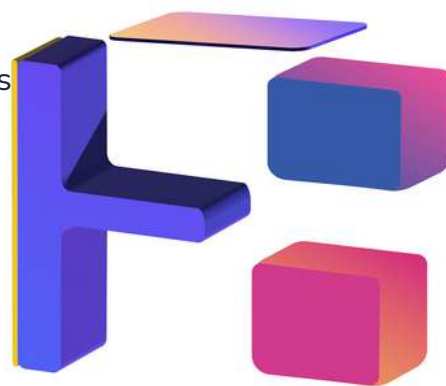

- More Utilization
- More Accessibility
- Zero Setup cost
- Net zero energy

Cargar has developed India's first portable and solar integrated charging hardware platform (Patent-pending) & UPI based charging payment technology that is going to charge the way people will charge their EVs.

We are making EV charging Truly Green, Fast & Super Easy

Cargar is a new age climate tech company providing India's first flexible, portable & greener electric vehicle fast charging technology for making EV adoption truly sustainable and scalable. We solve the space-time constraints of charging stations and relieves anxiety about charging Electric Vehicles.

Our tech platform solves EV charging and energy delivery problem by flexible fast to super fast energy conversion with easy renewable energy integration.

Now any location can become a fast charging place in **zero time with zero civil work**
