

Lino

Interactive Learning, Tailored for Kids

by ZipZap Toys Private Limited

Neha is not alone

60%

of mothers report feeling chronically stressed due to caregiving responsibilities.

83%

of parents feel guilty about their child's excessive screen use, with 50% actively seeking screen-free engagement options.

40%

less parental stress and more quality family time — reported by parents using engaging, tech-driven solutions

Meet Neha. A working mom in a Tier-2 city. Her 5-year-old son is glued to YouTube all day.

She's exhausted, guilty, and frustrated—but affordable, screen-free alternatives don't exist. Until now.

Why Parenting Feels Harder Than Ever

Morning Rush

Stressful mornings.
Screentime becomes
the babysitter.

Midday Guilt

Guilt kicks in. But
there's no alternative
to keep him engaged

Evening Fatigue

Toys feel outdated.
Digital play feels hollow.

Night-time Reflection

She wonders—how do I
break this cycle?

**This is not just Neha's story.
It's the daily reality of millions of Indian parents.**

We imagined a smart, safe, and scalable playmate—a toy that adapts to your child's needs while giving you a breather

Built-in animated
screen (Child-safe)

AI powered
learning buddy

Personalised tasks
and rewards daily

Voice interaction
with emotional
intelligence

Playful and
educational
content

Emotional driven Mascot
and different Mascots for
child interactions

Solution – Simplifying Parenting with Smart Play

Lino acts as a smart companion, helping mothers by engaging children in interactive learning and play—giving them time to breathe, rest, or focus on other tasks.

Enhancing Learning Through AI

AI-powered toy that personalizes learning, turning education into a fun and engaging experience.

Reduce Screen Dependency

Lino reduces screen time by engaging kids in safe, interactive play—like a smart, digital babysitter for hands-on learning.

Affordable And Scalable Innovation

Lino offers affordable, quality learning for Tier 2 & 3 families, with scalable bots that grow with your child for long-term impact.

Let's see what Lino does?

The Learning Playdate

Fun that makes kids smarter!

Lino turns learning into a game! Instead of memorization, it sings a Days of the Week song, plays a quick quiz, and even turns lessons into a treasure hunt.

- ABCs, numbers, science, and more
- Interactive voice quizzes
- Fun songs & memory tricks

 Kid: “Lino, how do I remember the days?”

 Lino: “Let’s sing together! 🎵
Monday, Tuesday, Wednesday—clap!
🎵”

The Little Cheerleader – Encouraging Confidence!

Lino helps kids believe in themselves!

When your child struggles with something new, Lino jumps in with motivational words and fun guidance to keep them going!

- Motivational words & encouragement
- Helps build confidence & patience
- Interactive challenges to keep kids engaged

 Kid: “Lino, I can’t draw a star!”

 Lino: “Nobody’s perfect the first time! Let’s do it together—make an ‘A’ and cross it. Wow, that’s a great star!”

The Tech behind it..

AI-Powered Companion:

Integrates artificial intelligence with cutting-edge robotics

Immersive Interaction:

Features haptic feedback, dynamic RGB lighting, and high-fidelity audio for engaging, multisensory learning

Seamless Connectivity:

Wi-Fi and Bluetooth for remote control, cloud-based updates

Versatile Applications:

Designed for education, entertainment, and personalized user experiences.

By 2034, India's toy market will triple.

Yet 80% of families still lack access to affordable, smart toys. Lino is here to change that.

India's total toy market in 2025, projected to grow at 14% annually, reaching ₹60,500 Cr by 2034.

Value Proposition for Rural Communities:

Affordable & Accessible

Scalable & Modular

Interactive & Engaging

Safe & Easy to Use

Potential Impact

Education: AI-driven learning fosters cognitive development & reduces screen time.

Parental Support: Engages children productively, minimizing gadget dependency

Economic Growth: Boosts EdTech & smart toy sector, creating jobs.

Social Empowerment: Makes quality education accessible, supports multi-language learning
