

Crumple Cash:

Every swipe = real gold.

AI layer that makes every card transaction work harder for users and merchants.

Every year,

Indians leave billions in rewards, discounts, and cashback unclaimed.

Every swipe is wasted value.

What if every swipe turned into real gold?

Problems

- **60% of users miss out** on rewards due to complex systems.
- **99% of Indians don't** optimize their credit cards.
- Merchants pay **up to 2–3% MDR** and wait days for settlement.

Why this happens

- Misconception; Credit cards = **rich-only** product.
- Rewards = scattered across bank portals, **hard to track**.
- Merchants = stuck paying fees, **losing margin**.

Crumple Cash:
The AI layer that turns
every swipe into real gold.

We solve it with

No wasted points.

Best card automatically
chosen, for users.

Zero MDR. Instant
settlement, for
merchants.

Stats Stand Out

100M+ credit cards issued (doubled in 3 years).

3.3 trillion spend in FY24 (↑51%).

Average ticket size = ₹5,190.

“And yet, most of this value leaks away.”

Our Value Proposition

Every swipe = real gold.

For users, no wasted points. For merchants, no wasted margins.

Competition

Rewards optimization

Crumple Cash
(high user
savings + merchant
zero MDR)

Banks/CRED
(optimize some
rewards,
but high MDR)

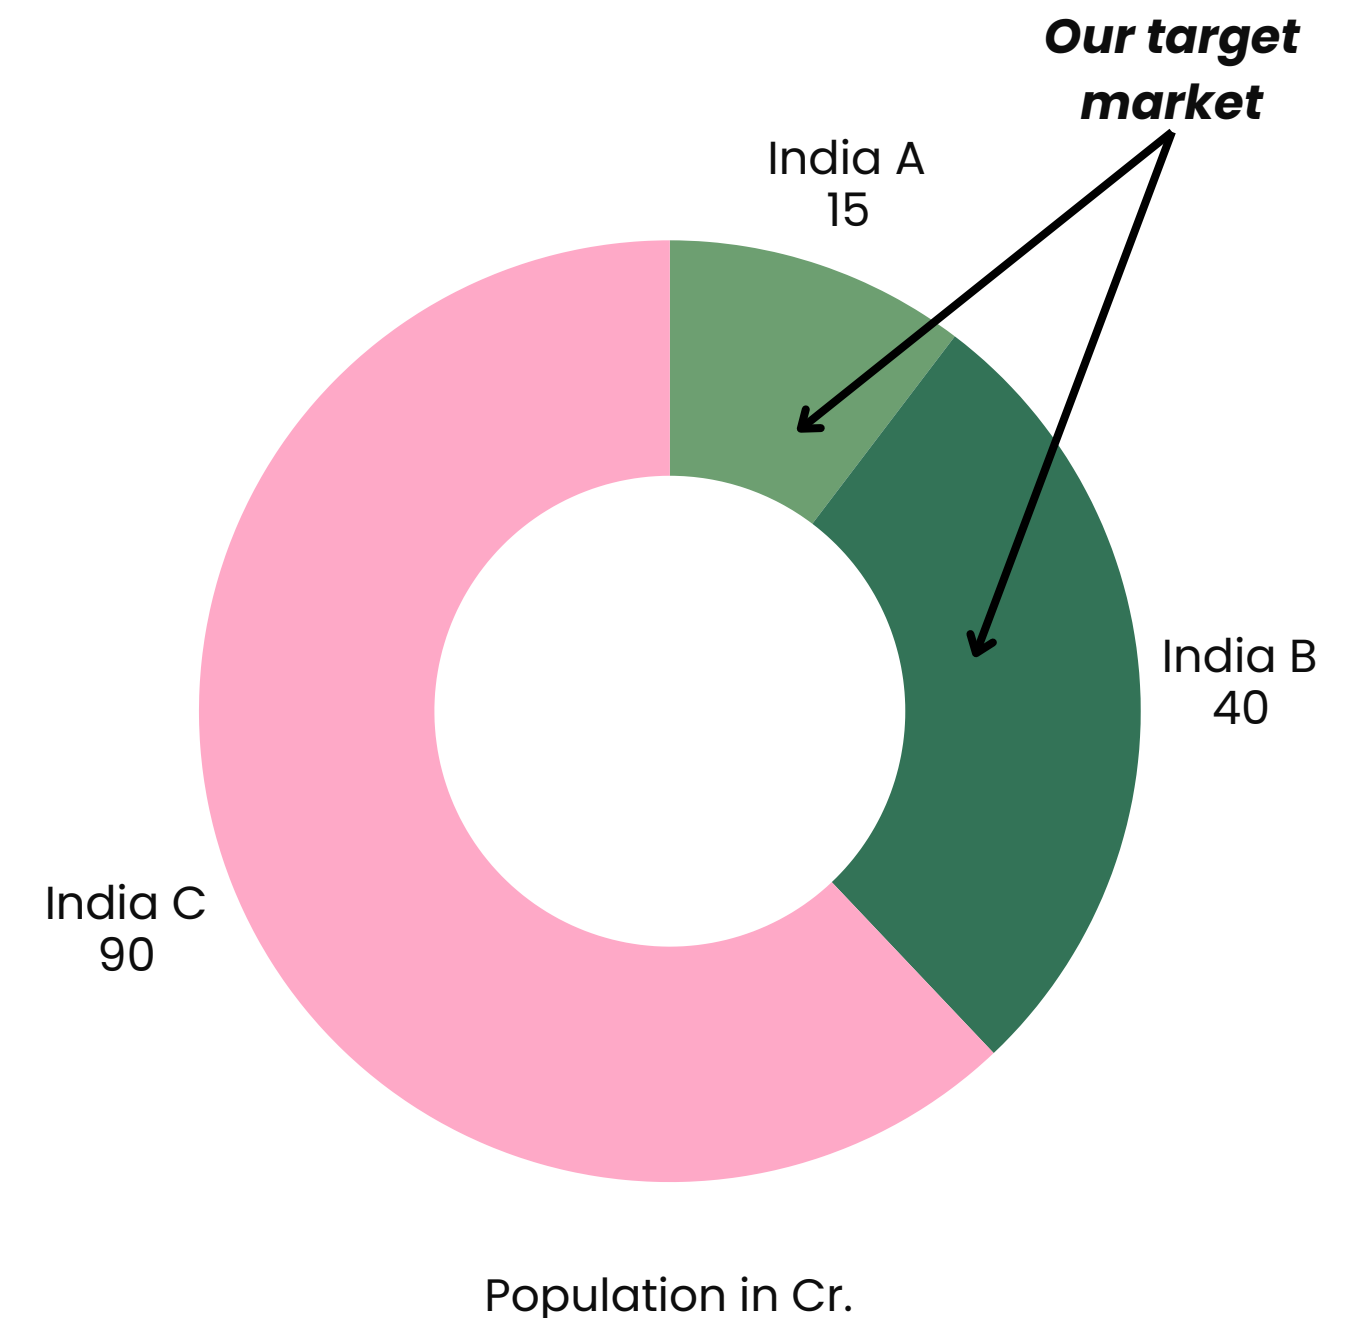

Merchant Benefit

Total Addressable Market

By 2030, 200M+ Indians will hold credit cards.

We're targeting 120M (Tier 1 & 2 users) who want smarter, simpler money.

Business Model

Banks:

Commission for cards sold.

Merchants:

Subscription for zero MDR + instant settlement.

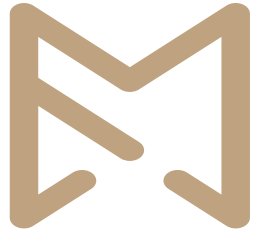

Users: Premium subscription for AI-powered optimization.

Tiered Gold earnings; redeemable in cash, catalogue purchase or conversion to airmiles.

Entry Barriers

- AI layer built on MCC-level intelligence (hard to replicate).
- Early partnerships with banks + merchants.
- Cultural brand: “**Every swipe = gold.**”

Milestones

We aim to become India's gold standard for credit card engagement in the next 12 months.

- 50,000+ active users
- 1,000 merchants across Tier 1 & 2 cities
- ₹100 Cr monthly GMV
- ₹2 Cr ARR

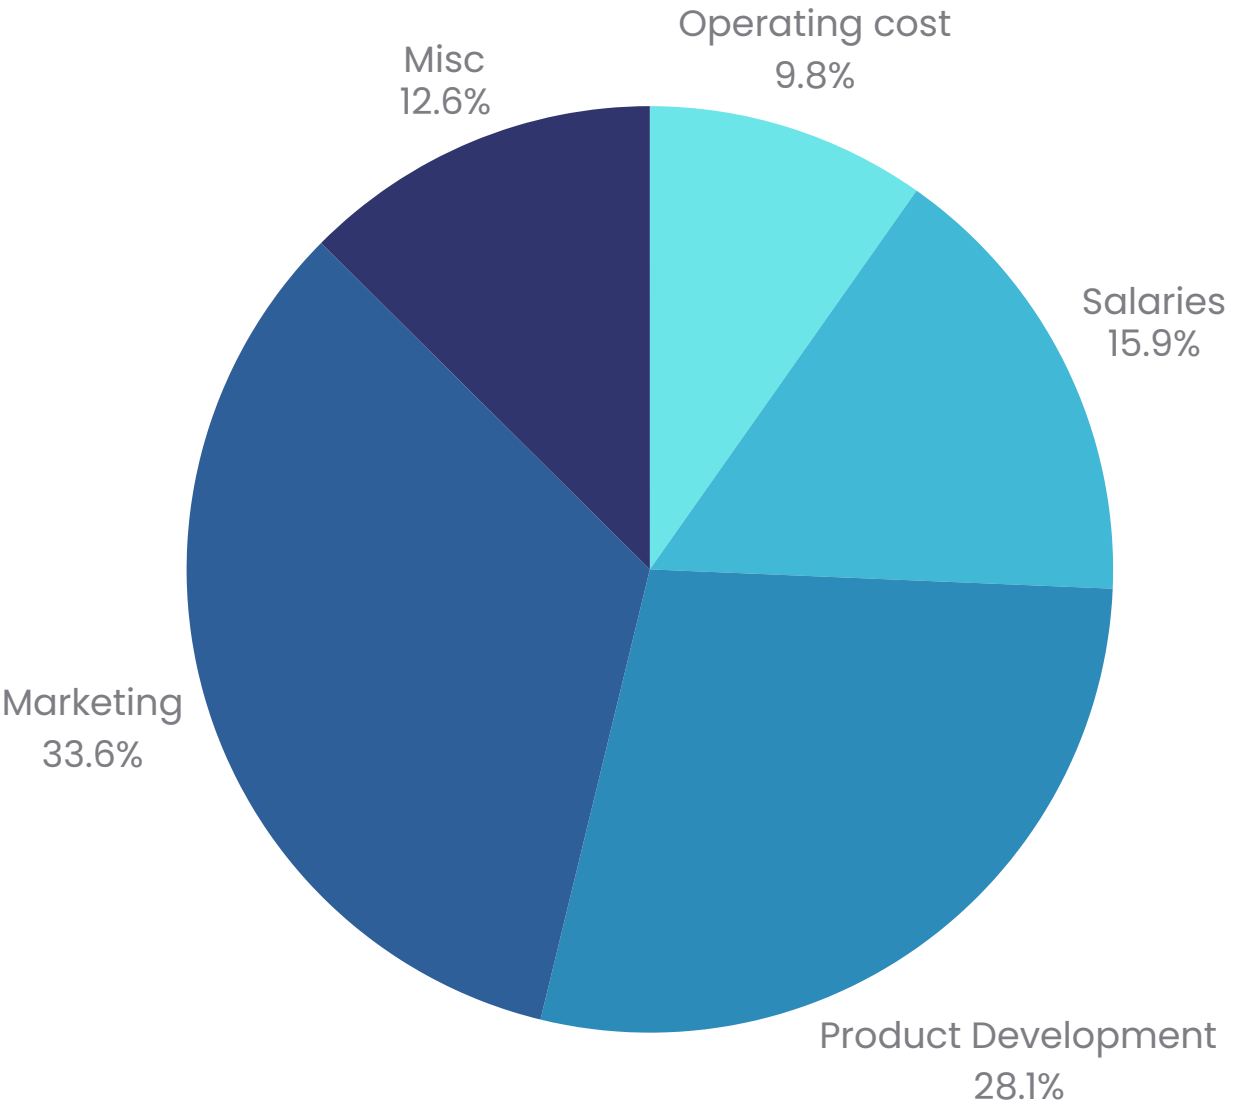

Also, **MOAT.**

- Proprietary MCC → Merchant → Reward database (biggest in India).
- API layer for Airlines.
- Community of super users (referral-driven growth flywheel).

Cost & Burn

Cost Head	Cost (Monthly)
Operating cost	57,000
Salaries	92,800
Product Development	1,64,200
Marketing	1,96,400
Misc	73,300

Monthly Burn (Rs) 4,73,700
Annual Burn (Rs) 5,684,400
