

Z I N T E R

INTERCITY. REIMAGINED

The Traveller's Pain

Long travel time due to multiple stops.

Poor last-mile connectivity.

Ride-sharing apps cancel at the last minute.

Bound by fixed departure schedules

Crowded Buses and Trains

Expensive Full Cabs

How Zinter Works

Book Your Seat

In a cab at your preferred time , not the whole cab

Convenient Pickup

Get picked up from doorstep/nearby points

Ride in Comfort

With 2 - 4 co-passengers in a spacious cab

Smart Drop-off

At your doorstep/nearby points

Our Product Offerings

All calculations are based on the Delhi-Jaipur Route

Cost per car : **₹3800**

Revenue : **₹700**

Our Solution

Guaranteed Rides

No cancellations

Affordable Travel

Pay only for your seat , not the cab

Flexible Hourly Rides

Ride at your own schedule

Convenient Pickups/Drops

Doorstep/nearby points

The Engine Behind ZINTER's Scalable Model

Demand-First Platform

Rides run every hour — cars allocated only after bookings close 2 hours before departure.

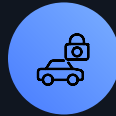

Scalable & Capital-Light

We partner with driver-owners instead of owning cars, enabling rapid expansion without heavy capex.

Fixed Driver Payouts

Drivers are paid full fixed fare regardless of passenger count.

Driver Collateral

Drivers keep a deposit; cancellations incur penalties, paid as bonus to replacement drivers.

Smart Cab Assignment

Algorithm allocates seats smartly for efficiency and women safety.

Demand-First, Loss-Capped, Infinitely Scalable

1. Bookings First

Passengers book seats up to 2 hours before departure. Demand decides how many cars we run.

2. Cars Allocated After Demand Closes

Example: 62 bookings for 6-seater → 10 full cars + 1 car with 2 passengers.

3. Only One Car Can Go Underfilled

At any hour, only the last car can have empty seats — that's our maximum possible loss.

4. Club Underfilled Cars Across Models

Example : If Ertiga has 2 seats and Dzire has 1 seat, merge → one full Dzire car. (Passengers upgraded, not downgraded.)

5. Loss-Capped, Infinite Upside

Downside limited to one underfilled car per route/hour. Upside grows infinitely with higher bookings.

Only one car can ever go empty — our loss is capped, our upside is infinite.

If BlaBlaCar Works, Zinter Will Thrive

ZINTER		BlaBlaCar
Reliable Hourly Rides Zinter provides guaranteed hourly rides with assured seats.		Unreliable Frequent cancellations and uncertainty for passengers.
Convenient Pickups / Drops Offers convenient nearby points and flexible doorstep options.		Limited Pickups and Dropoffs Limited to fixed pickup spots, set by drivers
Transparent Pricing Features transparent, fixed per-seat fares.		Variable Pricing Pricing varies significantly by driver.
Unlimited Hourly Supply Rides operate every hour across routes, providing maximum flexibility.		Irregular supply Availability is irregular and dependent on drivers posting trips.
Enhanced Safety All drivers are verified, rides are GPS-tracked, and SOS support is available for every trip.		No Safety Measures Relies on unverified drivers with no tracking and accountability.
