Background :

10 years of IT Strategy Consulting experience at Mckinsey

Expertise :

Management Consulting

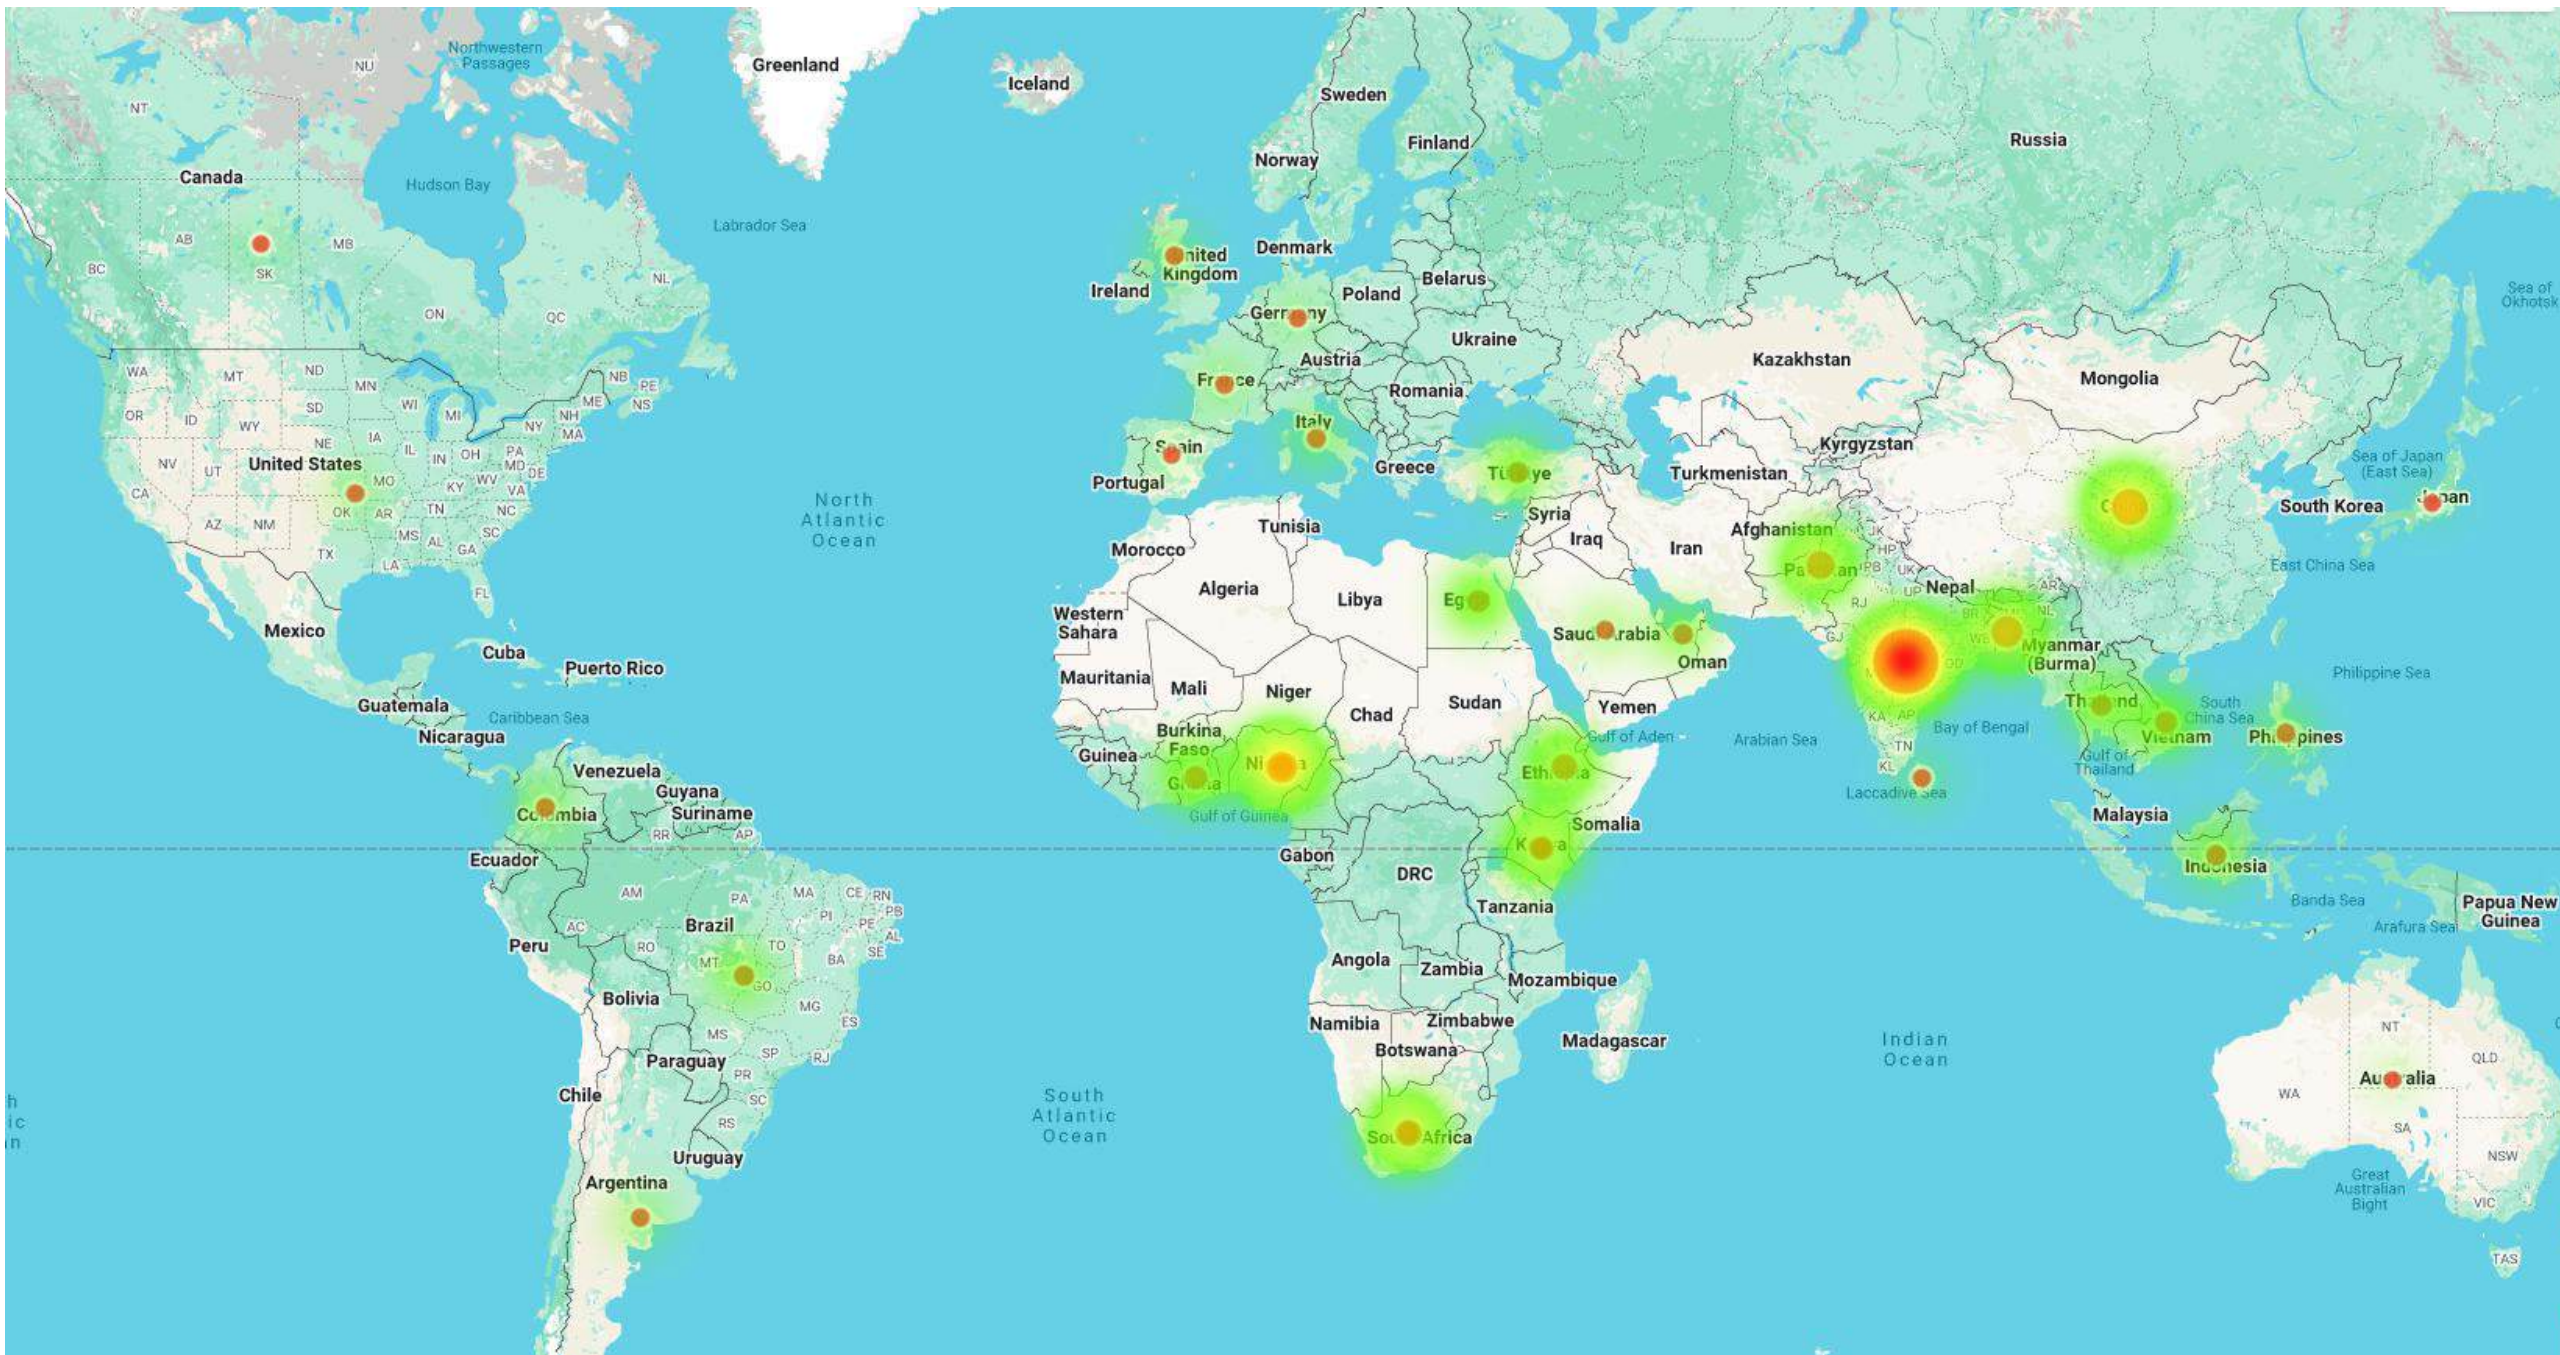

Education:

B.E. Information Technology (2011-2015)
Punjab Engineering College, Chandigarh

Empowering 100 Millions Fashion Entrepreneurs Worldwide

Darzee aims to empower 100M fashion entrepreneurs worldwide to design, manage, and deliver custom fashion at scale - so customers every where can turn imagination into reality with trust, efficiency, and creativity.

We're building a global, personalized, sustainable, and **AI - driven fashion ecosystem** - one that **replaces mass-produced fast fashion** with made-to-order creativity.

Region	Custom Clothing Density	
India	🔥 Very High (5M+)	Southeast Asia 🟡 Medium (Vietnam, Thailand)
Bangladesh	🔥 Very High (Textile Hub)	US & Canada 🟢 Low but premium
Pakistan	🔥 High	UK & Europe 🟢 Low but culturally rooted
Middle East (UAE)	🔥 High for tailoring	Australia 🟢 Low
Africa(Nigeria)	🔥 Growing tailoring economy	

Sources: ILO (2019) Global Garment Employment ~91M, World Bank Informal Economy Reports, McKinsey State of Fashion 2024, Google Maps Listings, Facebook Tailoring Communities, Darzee Internal Research.

PROBLEM

Fashion is broken.
Mass Production can't keep up with personal needs.

**"Nothing ever fits me right -
every brand has different sizing."**
Fiza AI User

**"All my orders are on paper -
I lose time and customers."**
Indie Designer

**"Half my closet is unused -
wrong fit, wrong style, wasted money."**
Fiza AI User

Customers Want Personalized Fashion

- But they get "one-size-fits-none" fast fashion.
- Customers can't explain what they want → poor fits & wasted money.
- No way to co-create with real designers — yet.

Tailors & Designers lack discovery, credibility, and business tools.

- A significant share of tailoring and garment work is driven by women, yet remains informal and under-digitized.
- Local tailors lack tools to digitize, scale, or market themselves.
- Most work offline, can't showcase catalogs or retain repeat customers.

Wastage & Inefficiency

- 30% of global clothing is overproduced and never sold
- Long supply chains = massive inventory risk.

One Platform. Two Superpowers.

Darzee + Fiza AI = Personalized Fashion at Scale

Darzee (for Businesses)

The Fashion Co-Pilot
for Designers & Tailors

-  Smart POS & ERP
for end-e-end workflow
-  AI-powered Catalog
Management

On-Demand • Local Designers • Zero Inventory Risk

A \$1.8T Market In Transition

Global Fashion Transformation Opportunity:

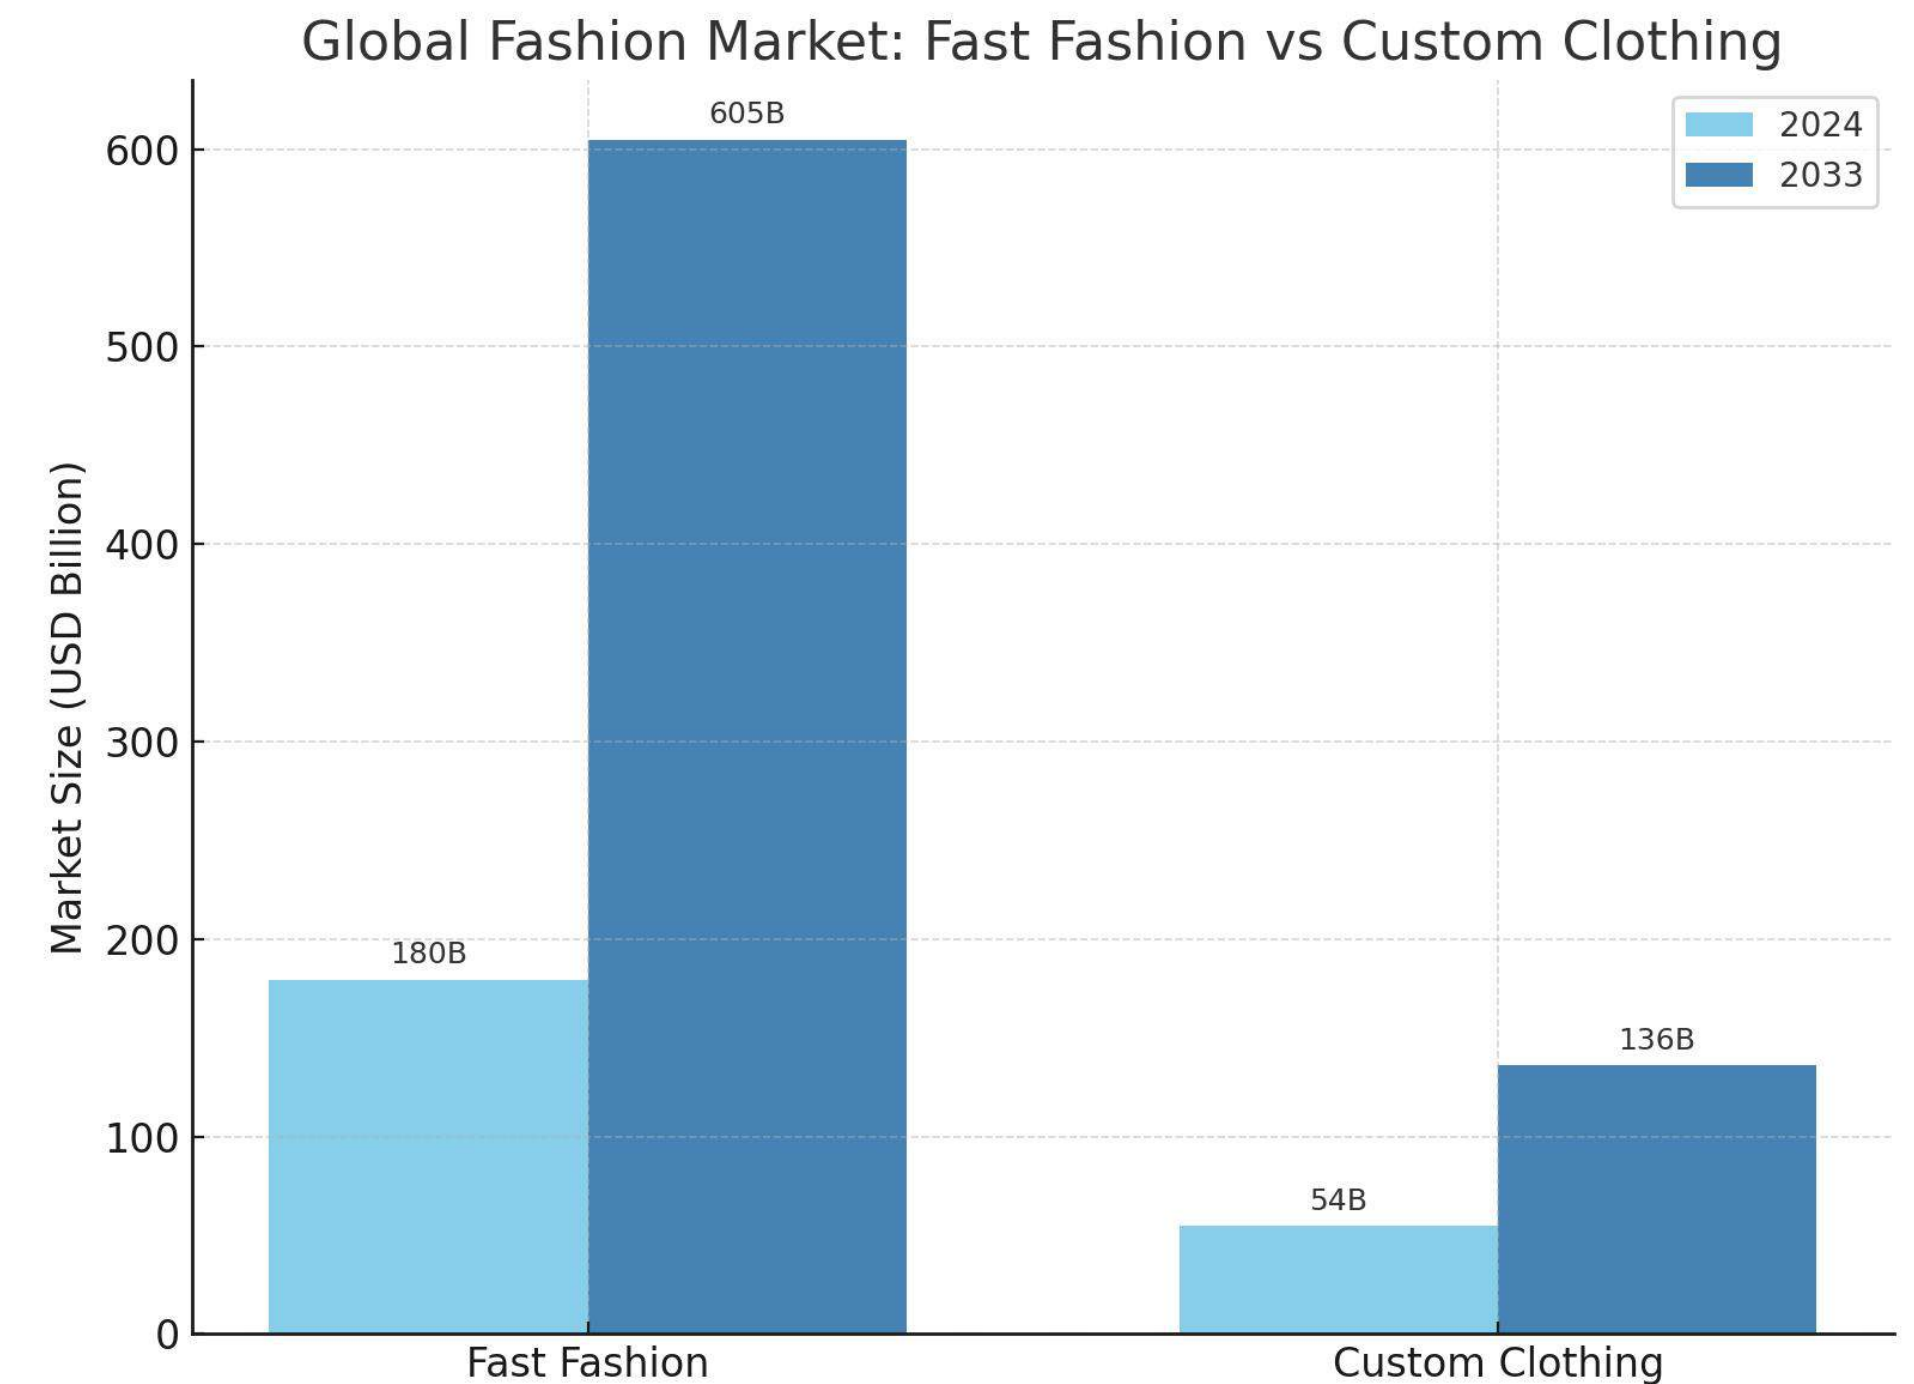

Darzee Isn't Just Targeting Existing Custom Clothing — We're Reimagining The Future Of How Fashion Is Created And Consumed.

- \$1.8 Trillion Global Apparel Market (Statista 2023)
- 30%+ Global Production Waste (McKinsey State Of Fashion 2024)
- 100M+ Tailors, Boutiques & Designers (ILO, World Bank)
- Rise Of "Made-To-Order" And "Nearshoring" Trends (McKinsey, 2023)
- AI-Enabled Personalization Will Become Mainstream By 2030 (BCG, McKinsey)

Top 5 Markets (Current Addressable):

- South Asia – 25M+ Tailors, \$15B+ Custom Clothing Economy
- Africa – 40 Million+ Fashion Entrepreneurs
- UAE/GCC – \$1B+ Premium Tailoring Market
- US & Europe – \$5B+ Custom Wear & Alterations Market

Replace Mass-Produced Fast Fashion With A Globally Distributed, AI-Powered, Made-To-Measure Model — Starting With India, Scaling Worldwide.

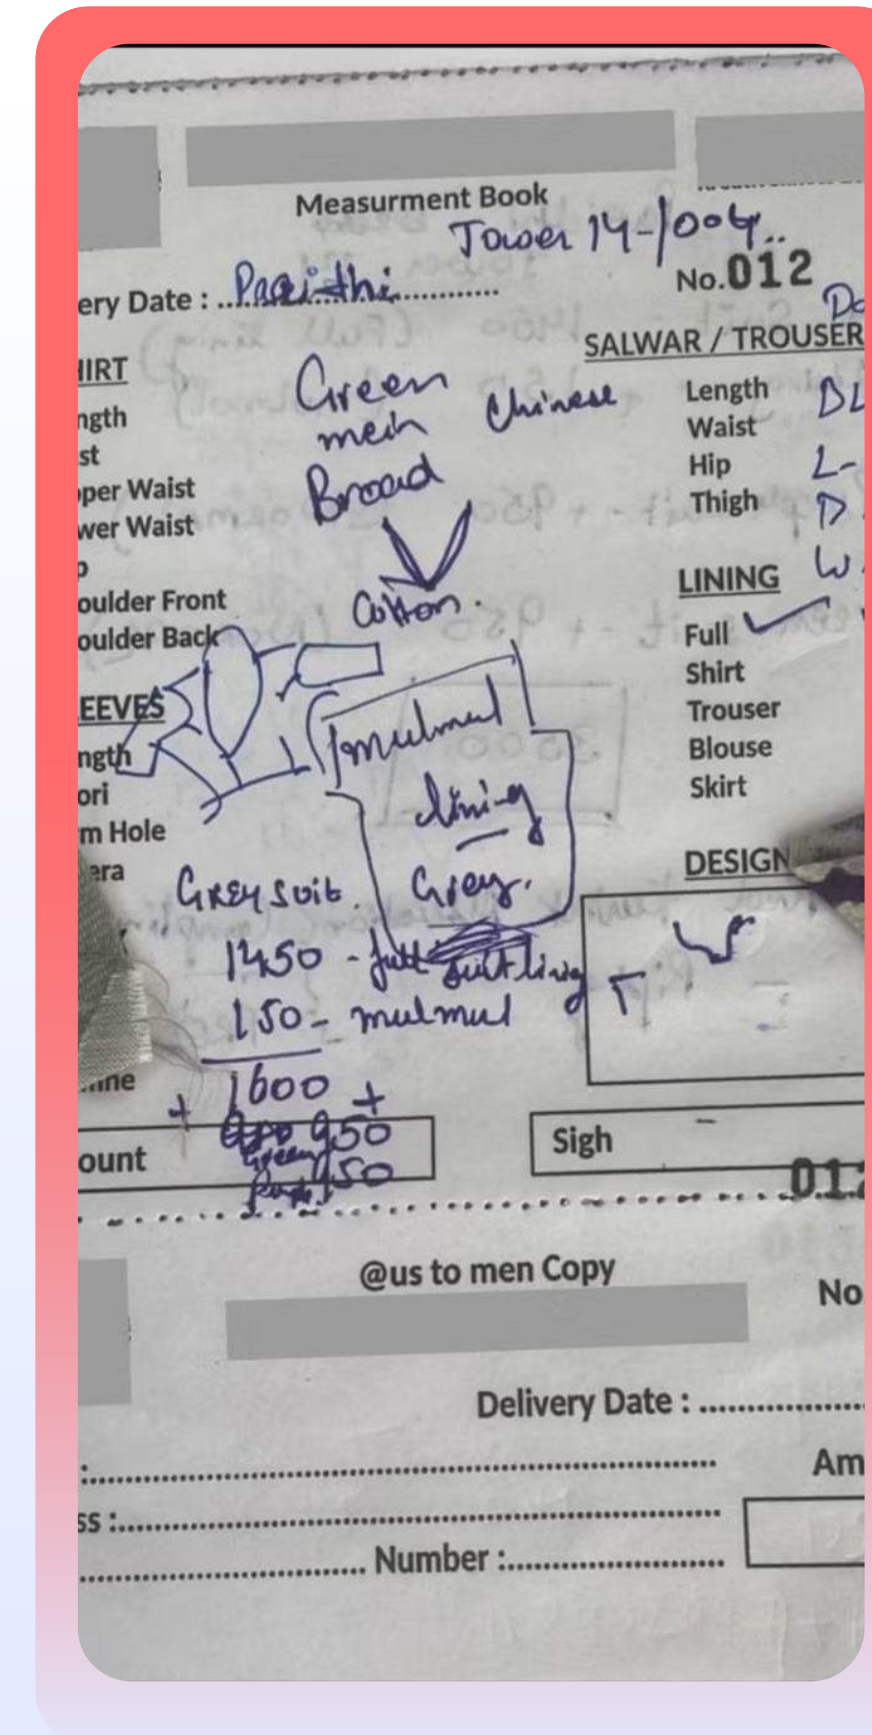

Our Value Proposition

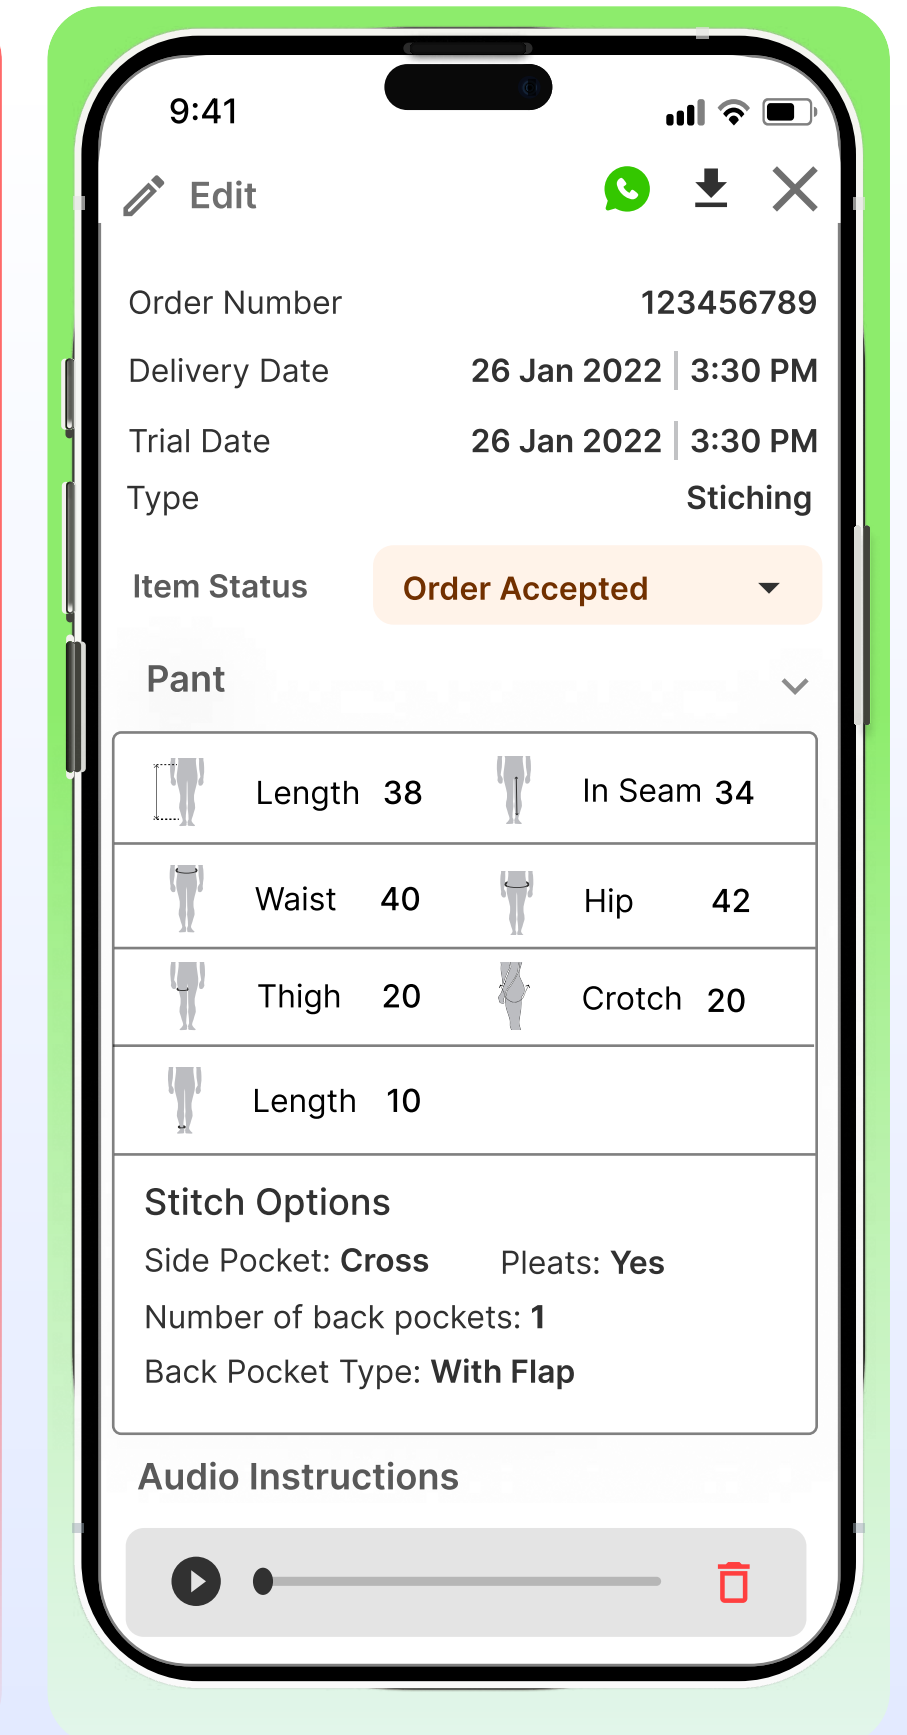

Providing a digital platform for tailoring businesses enabling:

-  Elevated Customer Satisfaction via digital portfolios and seamless communication
-  Widen Customer Reach by establishing a strong online presence.
-  Higher Productivity by streamlining operations like order management and employee tracking
-  Formal Financial Access through digital transaction history, billing records, and dashboards - enabling users to become loan-eligible with banks and NBFCs.
