AI-POWERED PLATFORM

From Information to Impact

LeMiCi's core mission is to organize the India's economic information and make it intelligent, useful & universally accessible.

Pitch Deck
@lemici2026

THE PROBLEM

Story and Scale

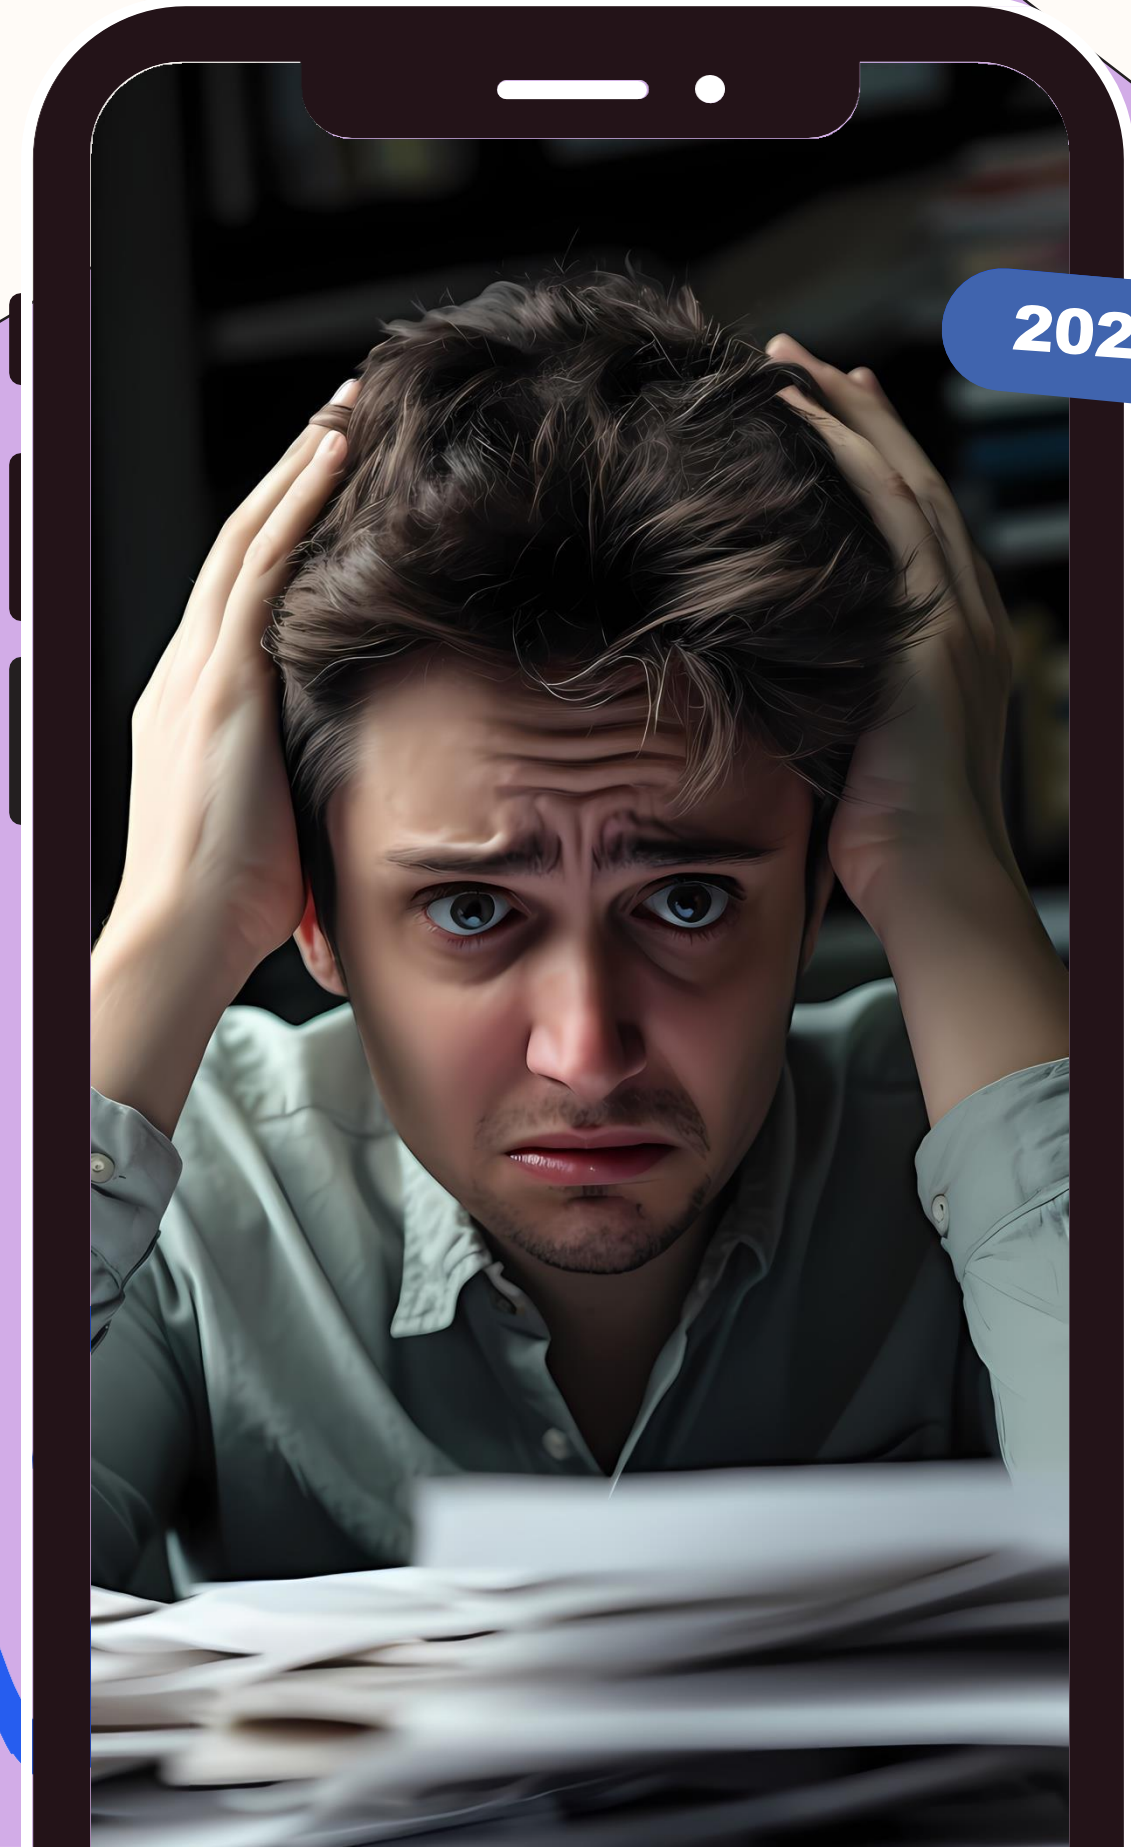

India's Entrepreneurs Are Making Blind Decisions

- **Meet Rajesh:** Wants to start a business in Pune with ₹20 L saved.
- **His Problem:** Spends 3 months on Google, visits multiple websites, calls expensive consultants, explores franchises/manufacturing/retail businesses with little clarity.
- **The Result:** Can't decide what business to pursue, Visits 100's of website for comprehensive research, Fails to find proper location within Pune, in dark over software's to use, Misses ₹5L government subsidy he qualified for, struggles to find low MOQ suppliers, still hasn't made a decision.
- **Bottom line:** 4-5 L Indians face this annually, ₹1,00,000 Cr market broken.

This is the reality for 63 million Indian SMEs and 2 million startups. The information exists. They just can't access it as it's locked in Data Silos.

'WHAT EXISTS TODAY'

Manual searches, limited by Individual's Imagination, expensive consultants, outdated portals, lack of personalization.
